

Advicor[®]

Security Features

(Bottles)

As part of AbbVie's ongoing efforts to enhance patient safety and combat counterfeiting of pharmaceutical products, AbbVie incorporated security features into Advicor packaging materials. Please exercise your usual due diligence before dispensing or using existing inventories of Advicor bottles.

For your security, please note that:

1. Advicor bottle labels are printed with color-shifting ink. When viewed at one angle, the ink appears violet in color. When changing the viewing angle, the ink gradually changes colors from violet to green.
2. You should accept an Advicor bottle only if the ink on the label shifts colors as described above. Please contact AbbVie immediately if you suspect that you have received counterfeit Advicor.
